Employment

Blue Schindler Studios – Front End Developer (12/2023 - 03/2024)

- Worked with a photography studio based in New York, USA to improve their presence online by developing a portfolio website.
- Developed a fully responsive portfolio website in collaboration with the Blue Schindler Studios team using React and SCSS.
- Enhanced the user experience of the photography portfolio website by actively incorporating client feedback and design preferences.
- Maintained a close relationship with a photography client, exceeding their expectations by implementing design revisions promptly.
- Assisted client with the selection and setup of a hosting plan.

Evvent – Full Stack Developer Intern (04/2024 - 07/2024)

- Designed and implemented a comprehensive review system.
- Developed reusable and modular UI components.
- Collaborated with the design and development team to ensure consistency and functionality.
- Actively participated in team meetings to discuss project goals, progress and challenges.
- Gained hands-on experience with Next.js, React, Tailwindcss and tRPC.

Projects

Recipi (<https://github.com/ajdinhusetovic/recipe>)

- Created a REST backend built with Node.js, NestJS and PostgreSQL with TypeORM.
- Implemented a dynamic and responsive frontend using React and TailwindCSS, ensuring an intuitive user interface for easy recipe management.
- Utilized AWS S3 for storing user and recipe images and easy access on the frontend.
- Successfully deployed the web app MVP on Render.
- Implemented authorization and authentication with JWT on both backend and frontend.
- Developed features for recipe management. Which includes, creating recipes, editing, saving, deleting etc.
